Scope of certification: The CodeMark Scheme is a building product certification scheme. The rules of the Scheme are available at the ABCB website www.abcb.gov.au. This Certificate of Conformity is to confirm that the relevant requirements of the Building Code of Australia (BCA) as claimed against have been met. The responsibility for the product performance and its fitness for the intended use remain with the certificate holder. The certification is not transferrable to a manufacturer not listed on Appendix A of this certificate.
Disclaimer: The Scheme Owner, Scheme Administrator and Scheme Accreditation Body do not make any representations, warranties or guarantees, and accept no legal liability whatsoever arising from or connected to, the accuracy, reliability, currency or completeness of any material contained within this certificate; and the Scheme Owner, Scheme Administrator and Scheme Accreditation Body disclaim to the extent permitted by law, all liability (including negligence) for claims of losses, expenses, damages and costs arising as a result of the use of the product(s) referred to in this certificate.
The purpose of Global-Mark **construction site audits** is to confirm the practicability of installing the product; and to confirm the appropriateness and accuracy of installation instructions
In placing **the CodeMark mark** on the product/system, the certificate holder makes a declaration of compliance with the certification standard(s) and confirms that the product is identical to the product certified herein. In issuing this Certificate of Approval Global-Mark has relied on the **expertise of external bodies** (laboratories, and technical experts).

SUBJECT TO THE FOLLOWING LIMITATIONS AND CONDITIONS AND THE PRODUCT TECHNICAL DATA IN APPENDIX A AND EVALUATION STATEMENTS IN APPENDIX B

Limitations and conditions:	**Building classification/s:**
1. Product selection, and incorporation into the building design, shall be made by a person who: a. Has received training in the use, application and technical aspects of the product; and b. Has ready access to all to the relevant technical information related to the product use.	Unrestricted
2. Product installation shall be carried out in accordance with the requirements in Appendix A, Section A5 by a competent person under the direction of a Builder, both of whom: a. Have received training in the product installation and been issued a ICANZ Insulation Installer Certificate; and b. Issue an Installation Guarantee Certificate.	Unrestricted
3. NSW Section J variations: a. For a Class 2 building or a Class 4 part of a building, where a relevant development consent or an application for a complying development certificate requires compliance with a BASIX Single Dwelling or Multi Dwelling Certificate issued under Version 3.0 or earlier, NSW Section J of NCC 2019 Volume One Amendment 1 applies. b. For a Class 2 building or a Class 4 part of a building, where a relevant development consent or an application for a complying development certificate requires compliance with a BASIX Single Dwelling or Multi Dwelling Certificate issued under Version 4.0 or later, Section J of NCC 2022 Volume One applies. c. For a Class 2 building or a Class 4 part of a building, where a relevant development consent or an application for a complying development certificate requires compliance with a BASIX Alterations and Additions Certificate, NSW Section J of NCC 2019 Volume One Amendment 1 applies. d. For a Class 3 building or Class 5 to 9 building: i. From 1 May 2023 to 30 September 2023 NSW Section J of NCC 2019 Volume One Amendment 1 may apply instead of Section J of NCC 2022 Volume One. ii. From 1 October 2023 Section J of NCC 2022 Volume One applies.	Class 2 to 9 buildings
4. Volume 1 NT Section J variation has no applicable requirement.	Class 2 to 9 buildings
5. In Tasmania: compliance with Volume Two Part H6 is a performance solution.	Class 1 and 10
6. The R-Value of insulation, including insulation used to mitigate thermal bridging, is reduced if it is compressed. The allocated space for insulation must therefore allow the insulation to be installed so that it maintains its correct thickness to achieve the product's stated R-Value.	Unrestricted
7. Permastop® Building Blankets cannot be used as sarking.	Unrestricted

APPENDIX A – PRODUCT TECHNICAL DATA

A1 Type and intended use of product

Refer to page 1 of this Certificate.

A2 Description of product

Fletcher Insulation is a glass wool fibre type bulk insulation complying with AS/NZS 4859.1:2018 Thermal insulation materials for buildings – Part 1: General criteria and technical provisions.

- Pink® Wall, Floor and Ceiling Batts, including Pink® Partition and Pink® SoundBreak™, for incorporation into the cavity spaces between framing members.
- Permastop® Building Blanket, lined with a reflective foil laminate.
- Permastop® Tropic Building Blanket, lined with a reflective foil laminate.
- Permatuff™ Building Blanket, lined with a reflective polyweave foil laminate.
- Pink® Sonomatt Blanket, lined with a black matt facing for partitions and screens.
- FirmaSoft™ Wall and Ceiling Batts for incorporation into the cavity between wall framing members and the spaces between ceiling support members.
- Pink ® NoiseSTOP, rigid board with black Durasorb poly-woven fabric facing for concrete ceilings, floors and walls.
- Pink® Thermal Slab, rigid board with reflective foil facing for under slab soffits
- General purpose, glass wool insulation blanket for HVAC ductwork and roofing .
- FI22 Ductwrap, glasswool insultion blankets faced with reflective foil and a 150mm lap for sealing external lagging of HVAC ductwork.
